SUBJECT: AQUASOFT II SYSTEM
DATE: 18/11/13

Dear Sirs,

Pls. be informed that we have been installed AQUA SOFT II at M/T EVIAPETROL I and M/T EVIAPETROL III since June 2012.

At M/T EVIAPETROL I AQUA SOFT II fitted in her steam boiler generator and at M/T EVIAPETROL III fitted in her steam boiler/exhaust gas generator (the double one).

Installation was very easy and no needed any modification and waste of time.

Since installation time between chemical cleanings at coils increased from 2 months to every year and the results was very satisfactory.

Coil temperature decreased about 10%.

From our point of view AQUA SOFT II is very useful for marine applications and we plan to install it to our vessels.

Andreas Nisiotis
